

Oshino 2012 Fishing GUIDE

Oshino is the village of the spring water :
 Oshino Hakkai, the eight ponds in Oshino, is created by the spring water of Mt.Fuji and this beautiful and mysterious Oshino Hakkai is one of the Japanese natural monuments. Oshino is the Mecca to Japan's fly-fishing
 Oshino, headwater of Katsuragawa, is a spring creek that is originated from the natural spring of the beautiful Mt. Fuji, thus the water temperature of the creek, through out the year, is highly suited for the activity of the trout.

Thank you in advance

Since there are many anglers in a limited area, please be considerate about other anglers so as not to disturb the water. If you are in any doubt ask those already there whether it is okay with them if you squeeze in.

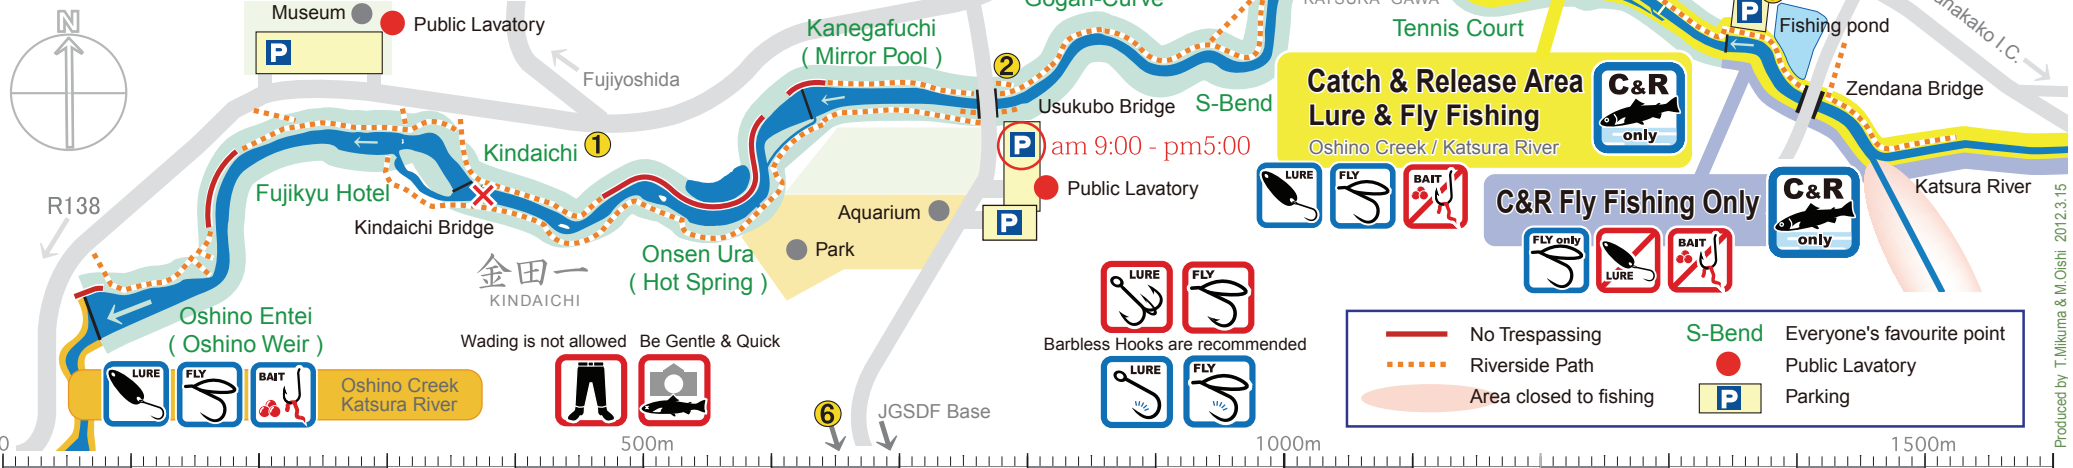

Because fishing from the riverbank is an Oshino style, wading is not necessary. Unnecessary wading can kill water plants and water beds for trout. The fishing net with a longer grip is very useful here. Also, it is highly recommended to use "barbless hook."

Please be sure to take back empty cans/bottles, trash, or any kind of used fishing material without leaving them at the site. It would be highly appreciated if you could also bring back any kind of trash and wastes found at the bank side.

To enjoy fishing and to keep the spring creek clean, we would like to ask for your kind cooperation.

The Oshino Fishery Regulation

- Fishing Seasons : Open on March 15th through September 30th
- Fishing Hours : You may fish only between one hour before sunrise and one hour after sunset.
